

Hi, I'm Evander. I've been studying Digital Interaction Design over the last 4 years at Duncan of Jordanstone College of Art and Design.

This project booklet details the experiments, ideas, the process I've gone through this year in the development and creation of CAPTCHR, my Honours design.

CAPTCHR consists of a series of speculative CAPTCHA styled interactions designed to comment on the increasingly intrusive data gathering techniques required to distinguish humans from computers.

 CAPTCHR

All my video prototypes can be seen on my YouTube channel:
