The synthetic CAPTCHAs are specu-
lative - they don't exist. To create an
effective design they need to have
a clear visual link to pre-existing
CAPTCHAs to make the connection
obvious.

Identifiable, constant features of CAPTCHAs include,

Box-ed shaped grey background.

Often encased
in a faint out-
line, can feature
blocked blue
backgrounds
too.

CAPTCHA logo
located in the
parameters of
captcha container,
often in the corner.
Left or underneath
the area of user
interaction.
